

## Power Your Global TV Experience

Launch premium, branded TV with advanced multiscreen technology.

Our comprehensive Content Owner Package provides everything you need to transition from traditional broadcasting to a cutting-edge digital platform. By partnering with our telco integrated TV CDN infrastructure, you can deliver high-quality linear and on-demand content directly to your audience's favorite devices with minimal lead time and maximum reliability.

### A Feature-Rich Viewing Experience

- **Linear TV & EPG:** Support for multiple live channels with a fully interactive 7-day program guide.
- **Catch-up TV & Cloud PVR:** Ensure viewers never miss a moment with automated recording and time-shift capabilities.
- **VOD Library:** Host thousands of on-demand movies and shows in a searchable, high-fidelity catalog.
- **Multi-Device Reach:** Native support for mobile apps (iOS/Android), web browsers, and a roadmap for Smart TVs and streaming sticks.

### Seamless Telco Integration

We bridge the gap between content and connectivity. Our platform is designed to sit directly within partner networks to ensure:

- **Optimized Delivery:** Localized CDN servers reduce latency and provide buffer-free streaming even on mobile data.
- **Integrated Billing:** Simple "one-click" registration using carrier billing, allowing users to pay via their mobile accounts.
- **Rapid Deployment:** Our API-driven architecture allows for low-cost integration into existing core networks and subscriber management systems.

“Our flexible architecture allows content owners to provision high-quality entertainment to customers on any device, combining premium libraries with a class-leading multiscreen platform.”

### Flexible Growth Models

- **Managed Service (PaaS):** We handle the infrastructure, software, and delivery so you can focus on content.
- **SaaS Model:** Install our proprietary stack within your own managed network to maximize utilization and reduce external streaming costs.
